CORE COMPETENCIES

- Native Android Development
- Kotlin & Java
- Jetpack Compose
- MVVM & Clean Architecture
- SOLID Design Principles
- REST API Integration
- Firebase
- Room & SQLite
- Coroutines & WorkManager
- Debugging & Production Issue Resolution
- Performance Optimization
- Code Reviews & Team Collaboration

PROFESSIONAL SUMMARY

Senior Android Developer with 9+ years of experience building scalable, high-performance enterprise and consumer mobile applications using Kotlin and Java. Expertise in modern Android architecture (MVVM, Clean Architecture), Jetpack Compose, and performance optimization. Strong experience in system design, module ownership, mentoring developers, and delivering production-ready applications used by thousands of users.

TECHNICAL SKILLS

Programming Languages

Kotlin (7+ years), Java (5+ years)

Android Development

Jetpack Compose (2+ years), ViewModel (6+ years), LiveData (6+ years), Hilt (3+ years), Coroutines (4+ years), WorkManager (4+ years)

Architecture Patterns

MVVM (6+ years), MVP (2+ years), Clean Architecture (3+ years), MVI (Exposure)

Networking & APIs

Retrofit (7+ years), REST APIs (8+ years), JSON (8+ years), Firebase (5+ years), FCM (5+ years)

Database

Room (5+ years), SQLite (8+ years)

Testing

JUnit (2 years), Mockito (2 years), Espresso (2 years)

Tools & Version Control

Android Studio (9+ years), Git (5+ years), Bitbucket (5+ years), SVN (3+ years), Jira (5+ years)

Build & Code Quality

Gradle (9+ years), SonarQube (2+ years)

CI/CD & Build Automation (Exposure)

Understanding of CI/CD pipelines and automated build processes

KEY ACHIEVEMENTS

- Reduced crash rate and ANR issues by resolving critical crashes and ANR issues through detailed Crashlytics analysis and systematic debugging.
- Successfully contributed to the migration of legacy Java modules to Kotlin, enhancing code readability, maintainability, and long-term scalability.
- Resolved complex production issues and optimized application performance through systematic debugging and architectural improvements.
- Integrated advanced technologies such as ML Kit (Face Recognition), Geofencing, BLE, and CameraX to build modern, high-performance features.
- Played an important role in module ownership and team collaboration, providing guidance and technical support to peers during development and code reviews.

EDUCATION

M.C.A., Pune University
2014 – 2016

B.C.S., Pune University
2010 – 2013

LANGUAGES

- English
- Hindi
- Marathi

WORK EXPERIENCE

Programmer Analyst, IT Gurus Software
11/2017 – 01/2026

TrueHR Attendance App

Enterprise workforce attendance & verification application using facial recognition and geolocation.

- Developed facial recognition using **TensorFlow Lite, ML Kit and CameraX**.
- Implemented Google Maps-based geolocation for attendance verification.
- Built scalable modules using **Jetpack Compose, MVVM, Clean Architecture, Hilt and Room**.
- Improved application stability through Crashlytics analysis and performance optimization.
- Play Store: TrueHR Attendance App [🔗](#)

PeopleHR

Enterprise HR management application for attendance, leave management, employee events, and document workflows.

- Developed attendance, leave, document and employee management modules.
- Integrated **Firestore Chat, BLE Beacon and Google Maps**.
- Improved stability through Crashlytics, bug fixing and code reviews.
- Play Store: PeopleHR India [🔗](#)

TradePartners

Enterprise sales & field-force automation platform for activity tracking, location monitoring, and workforce productivity.

- Developed field-force tracking and sales automation features.
- Implemented **Geofencing, Firebase notifications and Crashlytics**.
- Built scalable Android modules using **Kotlin, MVVM, LiveData and WorkManager**.
- Play Store: TradePartners [🔗](#)

Android Developer, Techolabz

09/2016 – 11/2017

Internal mobile products focused on fitness tracking, asset tracking, BLE device scanning, and notification automation.

- Developed apps like **Gymifi, Lost & Found, BLE Listing, Techolabz Notification**.
- Integrated BLE scanning, barcode, SQLite, and REST APIs.
- Analyzed requirements & translated into robust solutions.
- Debugging, bug fixing & app optimization.
- (Company closed; apps discontinued)
